FINE FURNITURE
It's all in the detail...

Mind Bender

May 2018 – High Point, NC –
Bespoke furniture manufacturer
Jonathan Charles showcases their
impeccable marquetry skills in a
new age format with their Op Art
Collection. Referencing trompe l'oeil
effects, these pieces are created
by using different veneers entirely
cut and laid out by hand to achieve
the optical illusions. Ranging from
wall décor to case goods to seating,
their collection brings a fresh and
unparalleled perspective to the
Old World technique.

Four-Point Star 3D Geometric Cabinet

42" W x 19.5" D x 80" H

Handcrafted with over 10,000 individual wood veneer slices, the Four-Point Star 3D Geometric Cabinet presents an optical illusion of its front doors protruding beyond their surface. The design uses a combination of Ebonized Boxwood, Sycamore, and Satinwood veneers. The polished brass door handles and inside drawer pulls match the unique shape of the four-point star design as a cheeky touch.

Psychedelic Op Art Mirror

42" square

Sourcing Ebonized Boxwood and Sycamore veneers, the Psychedelic Op Art Mirror achieves its trompe l'oeil effect by calculating precise measurements of each veneer placement to lend the illusion of varying depths and dimensions.

3D Op Art Chest of Drawers

42" W x 20" D x 36" H

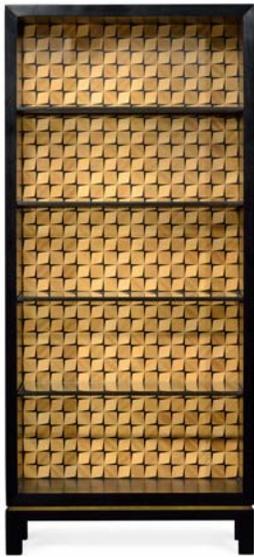

Standing on a solid brass base, the 3D Op Art Chest of Drawers tricks the mind into seeing its center billow out from the surface, thanks to a mathematical combination of Ebonized Boxwood and Sycamore veneers inlaid at precise placements. Shallow grooves form at either ends of the design for easy drawer openings.

3D Op Art Backlit Wall Panel

48" round

The 3D Op Art Backlit Wall Panel uses marquetry with Ebonized Boxwood and Sycamore veneers to give the illusion of a handle looping around itself ad infinitum. As a bonus, the wall panel is lined on the back with LED lights that can be plugged into an outlet.

Black Bookcase

37" W x 15" D x 82" H

No ordinary display for your objets d'art, the Black Bookcase serves eye candy with its mesmerizing 3D geometric pattern achieved using Ebonized Boxwood, Sycamore, and Satinwood veneers. The painted bookcase also features four glass shelves, interior lighting, and brass detailing along the base.

Oval Sofa Table

28" W x 16" D x 22.5" H

Striking at every angle, the Oval Sofa Table is a sculptural beauty. The asymmetrical brass tripod base supports a tabletop with an optical illusion reflecting a ripple effect. This is achieved through inlaid marquetry of Ebonized Boxwood and Sycamore veneers, contrasted in asymmetric concentric circles.

Black Sycamore Cabinet

42" W x 18.5" D x 32.25" H

The Black Sycamore Cabinet displays its mesmerizing 3D geometric pattern by combining Ebonized Boxwood and Sycamore veneers that are hand inlaid in various angles. With a black painted exterior, the cabinet is finished with brass detailing on the base.

3D Op Art TV Entertainment Unit

90.5" W x 21.75" D x 28.75" H

Comprised of a solid brass base and a statement door front display, the 3D Op Art TV Entertainment Unit is a show itself. Using Ebonized Boxwood and Sycamore veneers to create a pattern, the piece lends the illusion where the center pushes outward. The wide doors open to reveal plenty of storage inside.

Op Art Cube

15.75" W x 15.75" D x 15.75" H

A guaranteed conversation starter, the Op Art Cube commands attention with its "Is it or is it not" question of the trompe l'oeil effect creating the idea of concave sides. With all six sides created from hand-inlaid marquetry, the accent stool is a crowd pleaser.
